Reviews

This type of publication is every thing and helped me seeking ahead and much more. It usually fails to charge too much. It is extremely difficult to leave it before concluding, once you begin to read the book.

In San Francisco was one of the first lighting companies, and one of the very first attempts by a public lighting company to light a large city on a comprehensive plan. Power transmission at constant current was first used on the Coast, where not only a 10,000-volt motor circuit was installed in San Francisco, but long-distance transmission was also actually performed in the mines with as much success as attended electrical machinery anywhere at the time, and the failure, as far as it was a failure, was due to the faults of design and manufacture of that day, while attempting problems which admitted no failure in their solution. Men s lives, as well as the financial success of such undertakings, depend on absolute continuity in mining operations.
