Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1883 Excerpt: .1883 it is 22; for 1884 it is 33--30, or 3, and so on to the last year of the cycle, for which it is 18. From what precedes, it is evident that the epact for any year may be found by the following RULE. Diminish its golden number by 1; multiply the remainder by 11; and divide the product by 30; the remainder will be the epact required. Because the epact is also the age of the calendar moon at the end of February, we can easily deduce the time of the full moon that precedes Easter. Thus, for 1883 the epact is 22; subtracting this from 30, we have the day that the March moon ends; increasing the remainder, which is 8, by 14, we have the time of the following full moon, which is March 22d. Correction of the Epact. 172. When long periods of time are taken into account it is found that the average length of the calendar lunar month is a little less than that of a mean lunar month. This difference amounts by accumulation to 1 day in about 300 years. To lake account of this error and to bring the calendar moon into harmony with the actual moon of the heavens, it has been agreed to augment the length of one of the calendar lunar months by 1 day in every period of 300 years. This is done by diminishing the epact by 1 at every 300th year....
