The investigation of cyanogenesis in all the fodder plants used in the Sudan and in certain of the leguminosee, is a piece of research a chemist might carry out with advantage. 49 General Routine Work Tup: nature of this work may be classed under two main headings: 1. Pathological; 2. Chemical. It bulked so largely that little time was afforded for original investigations, but then again some of it was really more or less research work; and in any case the mere fact that so much had to be done thus early in the laboratories career, seems to show that they have filled a felt want. Under each of the above headings is placed a list of the examinations and analyses performed. 1.
