Industrial biotechnology involves the application of biotechnology-based tools to traditional industrial processes and the manufacturing of bio-based products in sectors such as chemicals, food and feed, detergents, paper and pulp, textiles, materials and bio-energy from renewable raw materials. The evolution of our ability to manipulate microbial genomes has revolutionized the field of biotechnology and has helped develop new bio-based processes that reduce environmental impacts while improving efficiency in numerous industrial sectors. The book includes 16 scientific and technical papers from the experts and professionals of 13 countries and presents noteworthy insights on the role of Industrial Biotechnology in providing a more sustainable foundation for the developing world's transition from an agrarian to an industrial economy. The book is expected to be of great value for the scientists, researchers and professionals who are engaged in this field to seek knowledge on the skills, opportunities, challenges and possible...
